Subject: Solar Project

Hi there,

I will not be able to make it to the meeting on Monday, but wanted to share my thoughts. My family and I live on Curtis Ave. and we find this potential project to be one of major concern. I feel the placement of this project is not appropriate or safe. Especially as it is right on top of a residential community. I feel like there could be several negatives to this plan if it were to go forward. At any rate, you can add my name and my husband's to the list of not supporting this plan to go through that would be great.

Thanks!

Kind regards,
Kalen and Zach Hoag

Scott,

As you can see from the thread below, I provided some images and video of recent (May) storm water issues in the Strathmore development to Kelli from the Strathmore HOA. The zip file is attached. This is just the latest iteration of the swale overflow issue. I have photos that go back 10-12 years that are similar.

While we have not yet experienced flooding in our house, many neighbors have. Because of my position with the City I would prefer not to wade into the debate over the proposed solar farm, other than to provide this information and express concern that any additional storm water runoff into a system that already floods, could be catastrophic. In the event this project does move forward, a robust plan for mitigating / eliminating runoff is essential.

Thanks much,

Mike

PS - In the event you cannot see/access the shared Dropbox file let me know and I will bring a CD over to the office.

Hi Mike,

Thanks for reaching out and also for sharing that footage of the swale behind your home. That truly is compelling evidence of the delicate nature of our storm water system.
